METRO ETHERNET

EXPAND. CONNECT. RECEIVE.
A MODERN-DAY ETHERNET SOLUTION

As communication needs and technologies continue to evolve, more and more businesses are looking for simple, scalable IT solutions in order to stay ahead of the curve. Comporium's Metro Ethernet combines the power of Ethernet and optical technologies across the Comporium MPLS network to provide businesses with the low cost, scalable and secure bandwidth solutions they need to send and receive information in today's mile-a-minute world.

METRO ETHERNET SOLUTIONS

Dedicated Internet Access – Dedicated IP access to the Internet via Ethernet access

Point-to-Point – Dedicated interconnectivity between two facilities

Point to Multi-point – Dedicated high-capacity connections between multiple offices

Multi-point to Multi-point – Dedicated any to any high-capacity connections between multiple offices

Voice, Data and Internet Managed Connection – Consolidate Hosted VoIP, Internet and data traffic on the Comporium Metro Ethernet connection

BENEFITS AND FEATURES

Scalability - capacities with bandwidth options from 10 Mbps to 100 Gbps allowing you to pay only for what you need.

Reliability - Our MPLS carrier-grade network is private and secure offering your business network resiliency, monitored SLA's, and Quality of Service (QoS) demanded features

Productivity - Dramatically improve daily business operations with fast, dedicated and symmetrical access speeds

Support - Our highly trained experienced CNOC technicians work with you in a collaborative manner to maintain your Ethernet connectivity.
